

Six Simple Rules for SimUText Success

1. **As soon your instructor provides your SimUText subscription information** (which will include a unique link for your class), **get registered for your SimUText**. That way you can be confident that you have ironed out technical issues well before the due dates for submitting work.
2. **Avoid waiting until the last minute to submit your answers!** If you encounter technical difficulties (e.g., internet issues), you will want time to return and try again.
3. **Plan your time, so you won't have to do too much in one sitting.** Active learning requires more focus and energy than passive reading/skimming. Consider completing your assignments over multiple sessions, submitting answers as you go rather than at the last minute.
4. If you do encounter problems, **we are here to help!** Visit our **support pages** (<https://simbioactivelearning.zendesk.com>) where you'll find video tutorials and answers to common, searchable questions. If you don't find a solution, submit a support request using links on the support pages, and we will respond within one day.

We hope you enjoy our modules. Our goal is to make learning a positive, productive experience. Good luck!
